

Welcome!

# BRAZOS ELECTRIC PUBLIC OPEN HOUSE MEETING

## PROPOSED KOSSE SW – KOSSE 138 KV TRANSMISSION LINE UPGRADE PROJECT

Welcome and thank you for taking time to attend this “come-and-go” public meeting for the proposed Kosse SW – Kosse 138 kV Transmission Line Upgrade project.

Kosse Community Center	Jan. 15, 2026	4-7 p.m.
------------------------	---------------	----------

### PROJECT OVERVIEW

Brazos Electric plans to upgrade approximately 5.6 miles of existing transmission line between the Kosse Switch and the Kosse Substation in Limestone County, Texas. The existing 69 kilovolt (kV) single circuit line is more than 60 years old and has been recommended for improvements to support reliability, improve operational flexibility, and provide additional interconnection capacity for the region.

The upgraded line will be a 138 kV double circuit line constructed on modern single-pole steel or concrete structures, improving long-term resiliency for Brazos Electric and its member cooperatives. To maintain continuous service during construction, Brazos Electric will shift the transmission line centerline and acquire an additional 35 feet of easement adjacent to the current right-of-way.

### PROJECT DEVELOPMENT PROCESS

Brazos Electric will submit a proposed route to the Public Utility Commission of Texas (PUCT).

When the PUCT submittal takes place, Brazos Electric will notify affected landowners along the proposed route and provide information on how to be further involved in the transmission line review process at the PUCT.

### PUBLIC MEETING PURPOSE

The purpose of this meeting is for Brazos Electric to present information, answer your questions about the project, and receive your ideas and concerns. You will notice that there are several exhibits around the room. Representatives of Brazos Electric and Oaklight Environmental are available to answer questions about the proposed project. Please spend as much time as you need at each exhibit.

### We Want Your Input!

Fill out a questionnaire. (Leave it with us tonight, or take it home and mail it back to us by Jan. 29, 2026)

Visit our Website
